On the Cover:

A beautiful Persian Miniature in the Isfahan style, dating from the late 16th century, depicting a hunt scene for Badr-al-Din Helali's poem *Šāh o gedā*. Badr-al-Din (Nur-al-Din) was an accomplished Persian poet of Turkish origin who lived from 1470-1529 when he was executed. This illustration was most likely painted in Isfahan after the poet's death in 1590. The miniature is part of the collection of the Museum of Mediterranean and Near Eastern Antiquities in Stockholm

Registration and the Desert Bred Saluki

By Susan Schroeder

Once upon a time when we spoke of desert breds, it was just assumed that the Salukis in question were not registered and there was no way they were going to be. Times have changed - for the better, we think- and now there are several ways a Saluki either from a country of origin (COO) or descended from imports from COO, can achieve AKC registration.

In those simpler times, not so very long ago, when we spoke of direct imports, we spoke of Salukis about whom nothing verifiable was known. We knew they looked like Salukis, and there may have been some record of their sire and dam, but nothing that could be accepted as fact. These were the generation 0 hounds. At that time generation 0 always meant a direct import, and a direct import always meant it was generation 0.

There are now two established registries in countries of origin - one in Israel, which is recognized by the AKC; and one in Bahrain, which is an FCI associate member, but is not recognized by the AKC. With these two registries, it is now possible that an import from either of these countries will come with a generation 0, 1, 2, or even a complete generation 3 pedigree. Direct import no longer always means generation 0, although a generation 0 hound is always going to be a direct import. A generation 0 hound is still an unknown quantity about which all we know for sure is that it looks like a Saluki and it is from a country in which the Saluki is indigenous.

The Society for the Perpetuation of Desert Bred Salukis (SPDBS) serves as a domestic registry recognized by the AKC. Through a critique process, SPDBS can register generation 0 through 3 desert bred and direct desert descent Salukis, including Salukis with incomplete pedigrees from reciprocating registries. Generation 3 Salukis registered with SPDBS that are whelped in the United States can apply for AKC registration.

So, lets count the ways AKC registration can happen for a direct desert descent Saluki:

1. It has a complete, 3 generation pedigree, it is whelped in the US, and it is critiqued into the SPDBS registry.
2. It has a complete, 3 generation pedigree, it is whelped and registered in Israel and is imported into the US following the AKC's rules for imports.

3. It has a complete, 3 generation pedigree, it is whelped and registered in any country with a registry the AKC recognizes, and it is imported into the US following the AKC's rules for imports. The pedigree can contain hounds from a registry that the exporting country recognizes, but that the AKC may not, i.e., Bahrain, which is an FCI associate member and is accepted by most FCI countries.

We hope this helps clear up some of the confusion surrounding AKC registration and the desert bred Saluki.

The DBE Committee

In 1989 the Desert Bred Education committee was formed by Sandra Cody, President and the SCOA Board of Directors. Mary Beth Rogers was seated as Chair and the committee was charged with bringing the Desert Bred Saluki to the SCOA National in an educational manner.

With the help of Eugenia Kissinger, the first Exhibition was held in 1989. With the exception of 1990, the Exhibition has been held at the National continuously from its inception. Since 2002, with the recognition of the Society for the Perpetuation of the Desert Bred Saluki's AKC independent Domestic Registry status, the Exhibition has featured the Imports and their Generation 1 and 2 progeny. Highlighted at the close are those Salukis who have "graduated" from the SPDBS studbook and achieved full AKC registration and privileges.
